Kudzis Bookings

Hotel, activity and dining bookings across Zimbabwe

Kudzis Bookings is a live booking platform for Zimbabwean travel: handpicked hotels, safari lodges and rest camps (Victoria Falls, Hwange, Great Zimbabwe, Mana Pools, Matobo Hills, Lake Kariba), plus guided activities and Zimbabwean lunch and dinner dining.

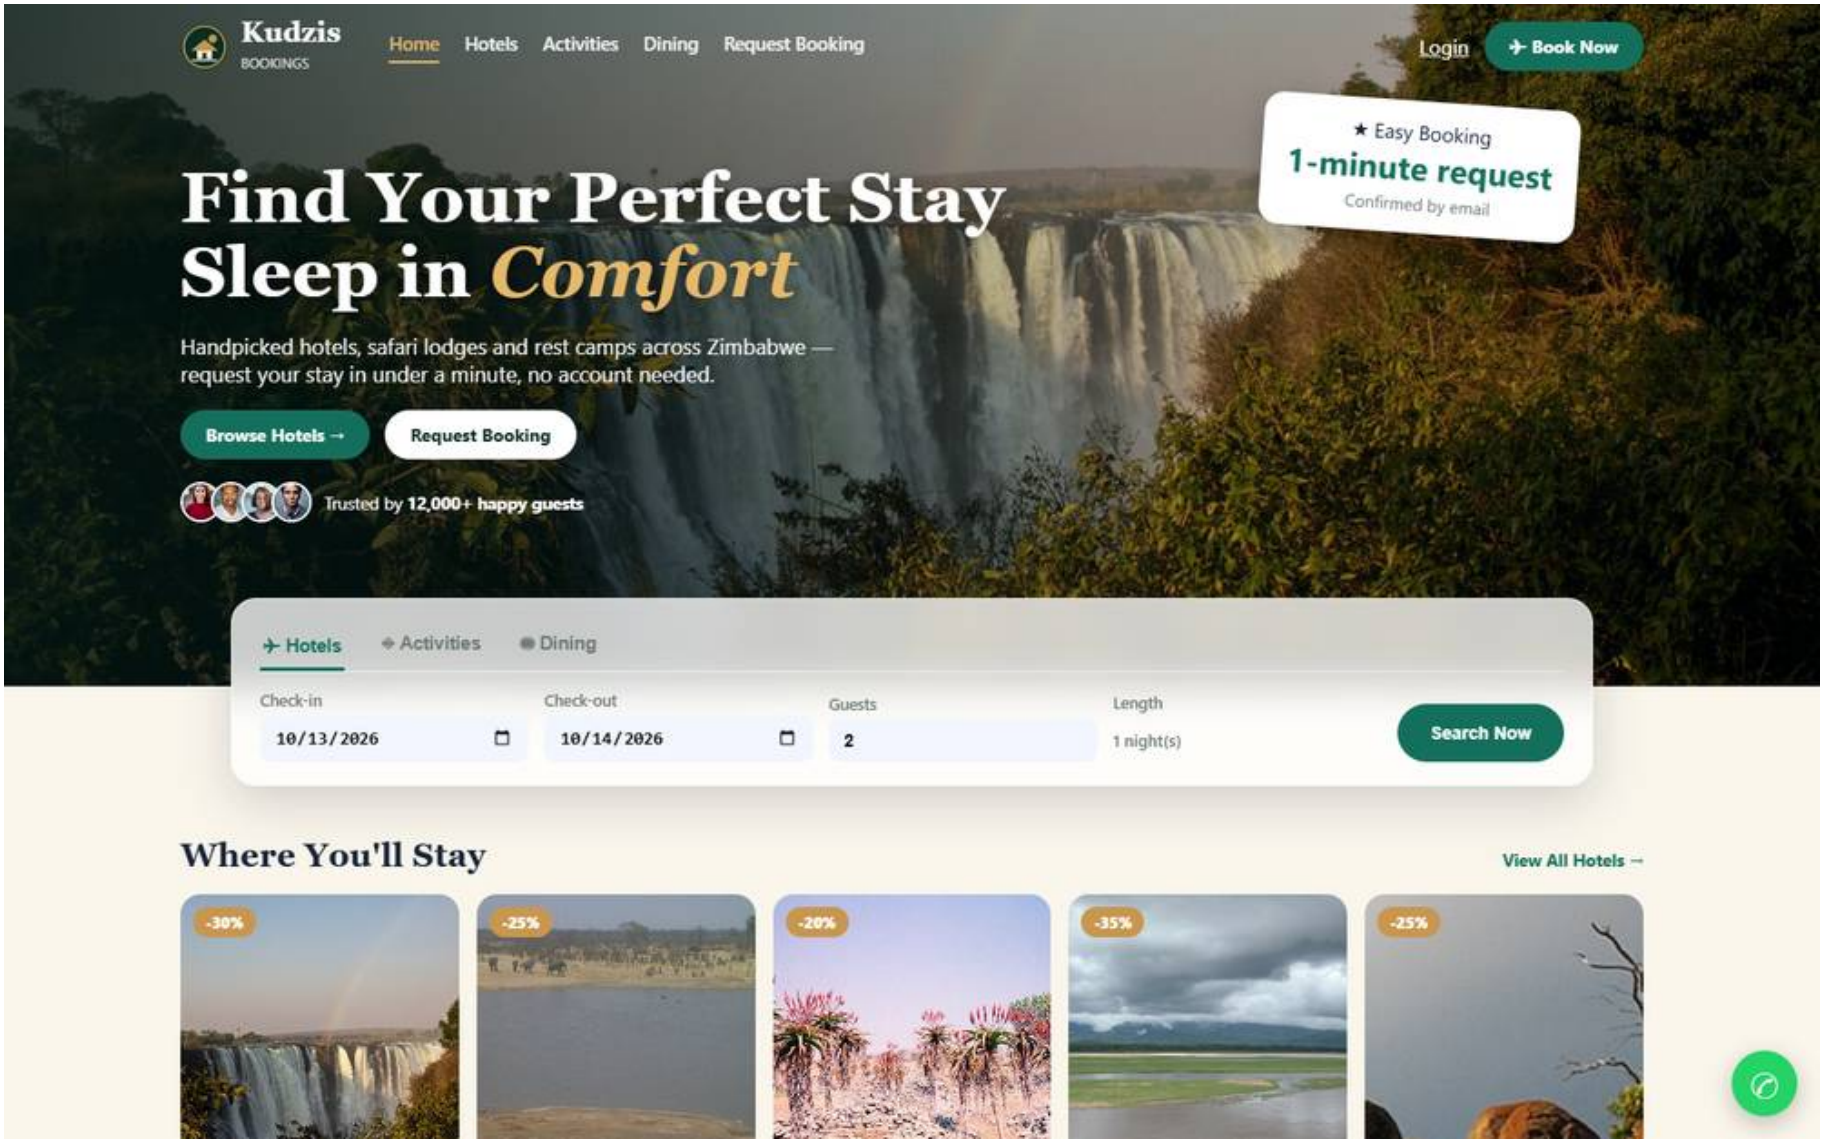

How it works: (1) guests browse live availability on calendars; (2) they select a stay, activity or meal and their details carry into a booking request - no account needed; (3) the team confirms by email and the guest pays on arrival. Registered guests can also pay deposits online (EcoCash, PayNow, card) and message the team on WhatsApp.

Staff run everything from an operations console: booking and request inboxes, room / activity / table catalog management, revenue and occupancy reports, guest reviews moderation and team accounts - backed by an ASP.NET Core API, EF Core with SQL Server and PostgreSQL, JWT authentication, and an Angular guest site plus staff console.

Live site: https://hotel-booking-system-kappa-eight.vercel.app | Contact: +263 (242) 123-456, info@kudzisbookings.co.zw, 123 Samora Machel Ave, Harare.

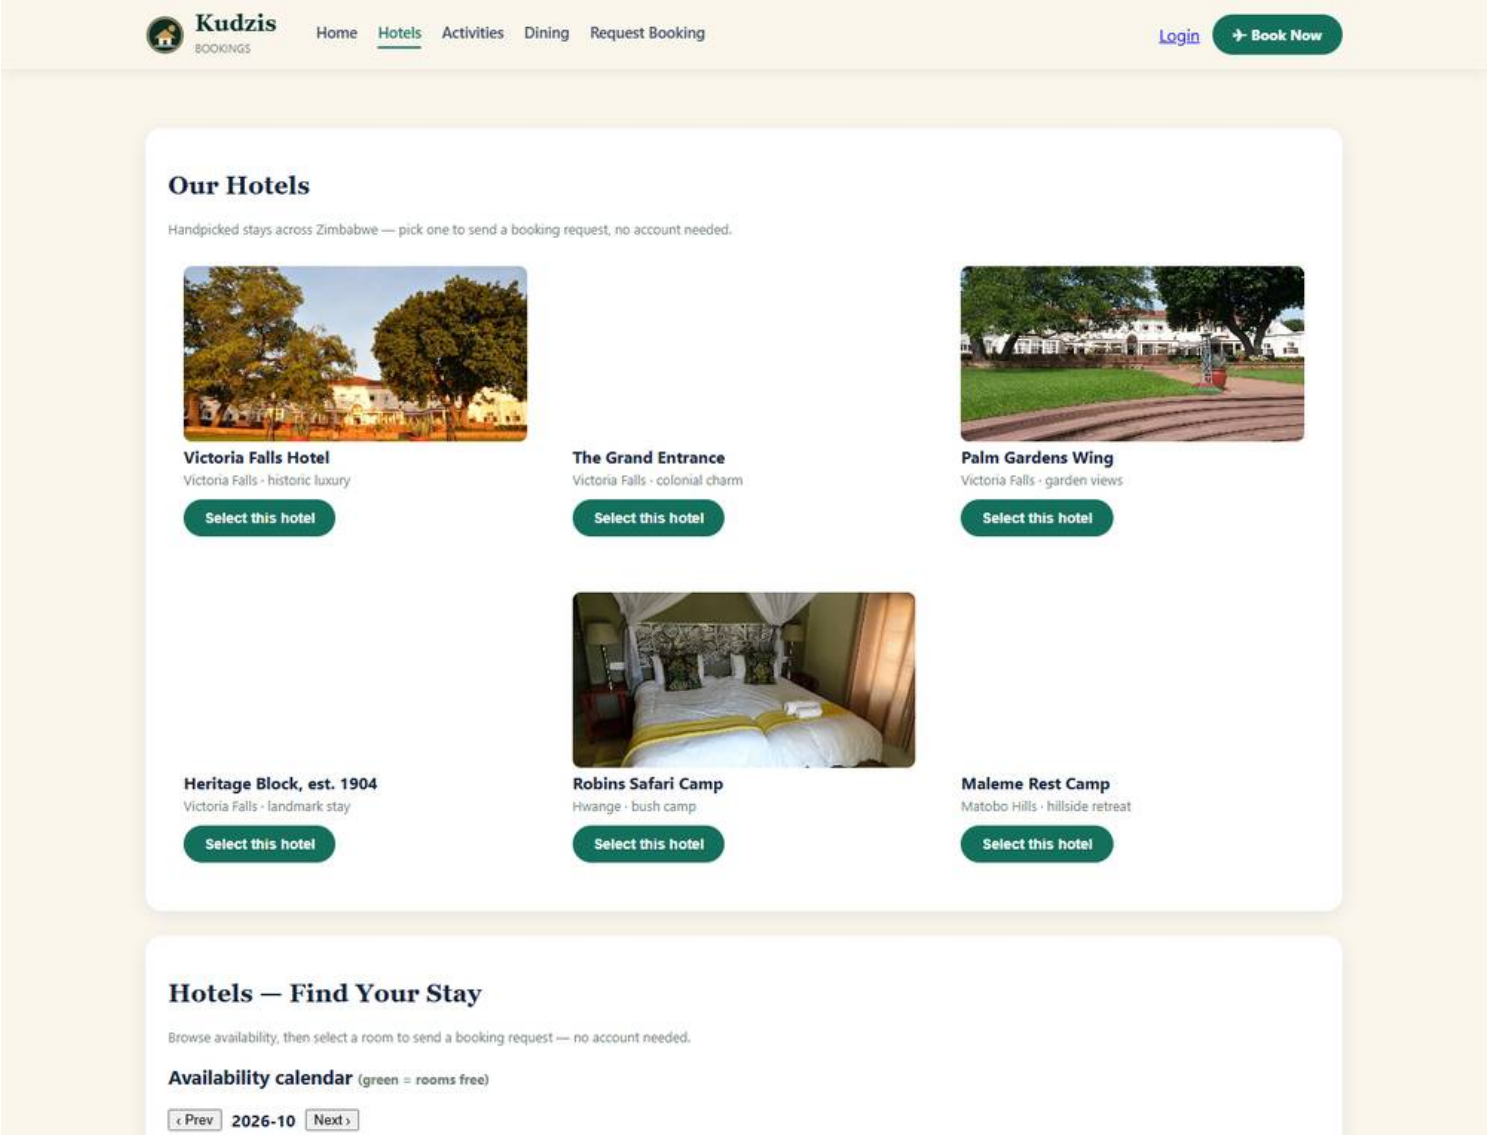

Homepage hero

Falls backdrop, availability search and destination cards.

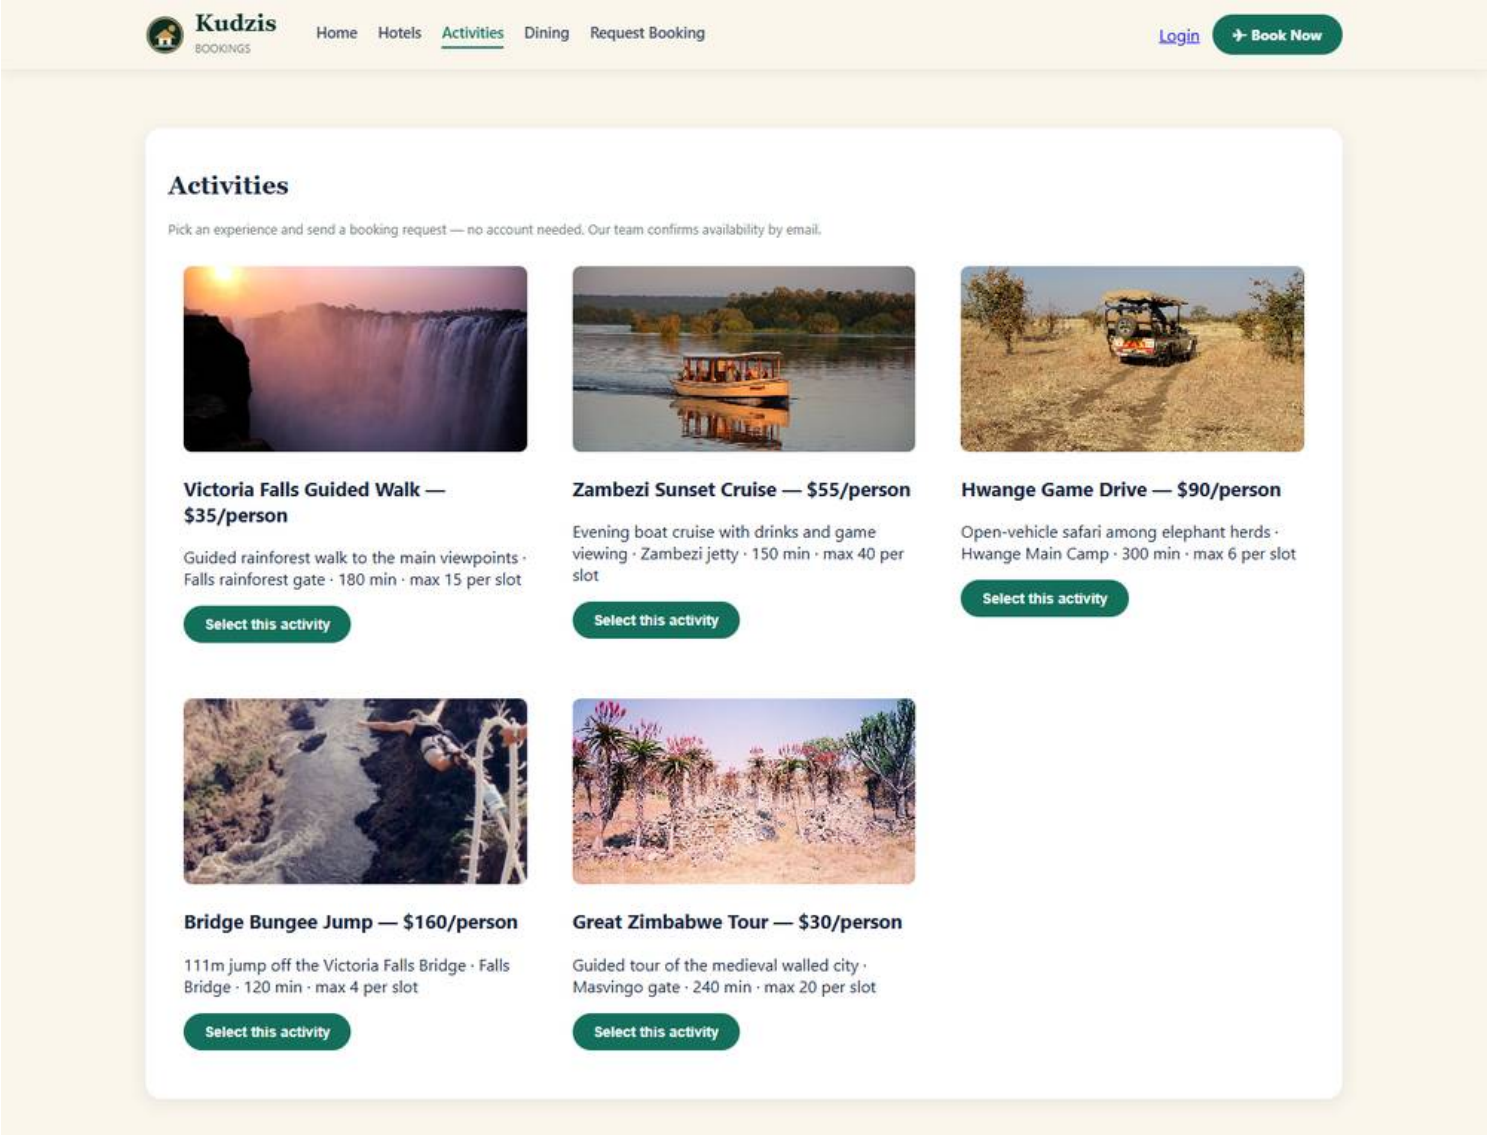

Hotels

Browse the collection, check the availability calendar and select a stay.

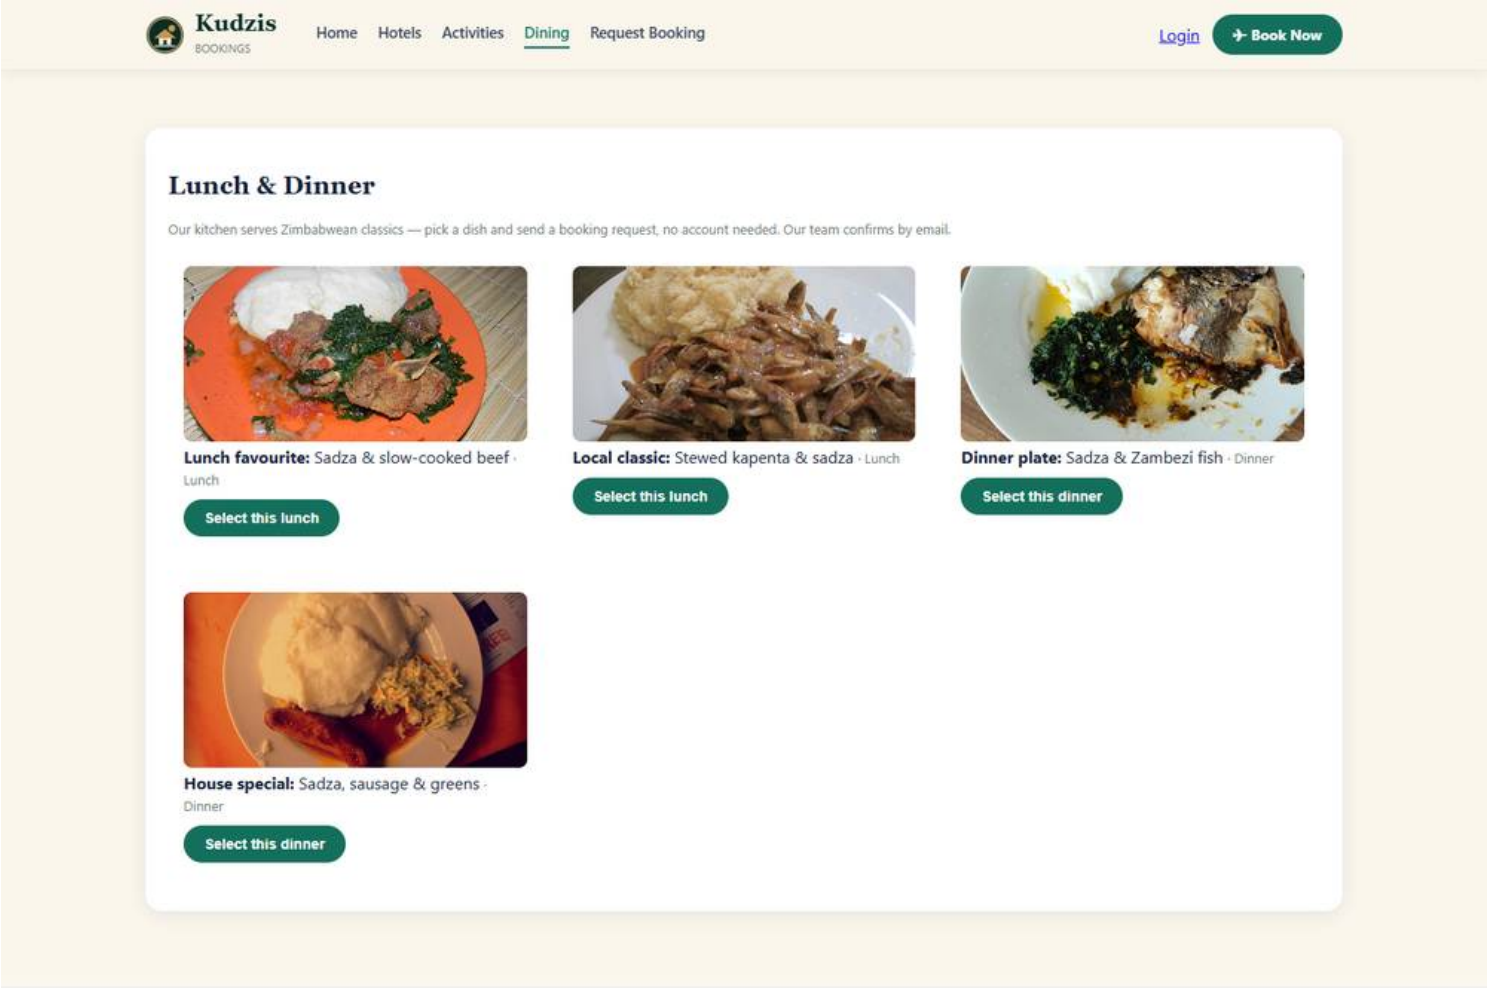

Activities

Guided walks, cruises, game drives and adventure, each with live pricing.

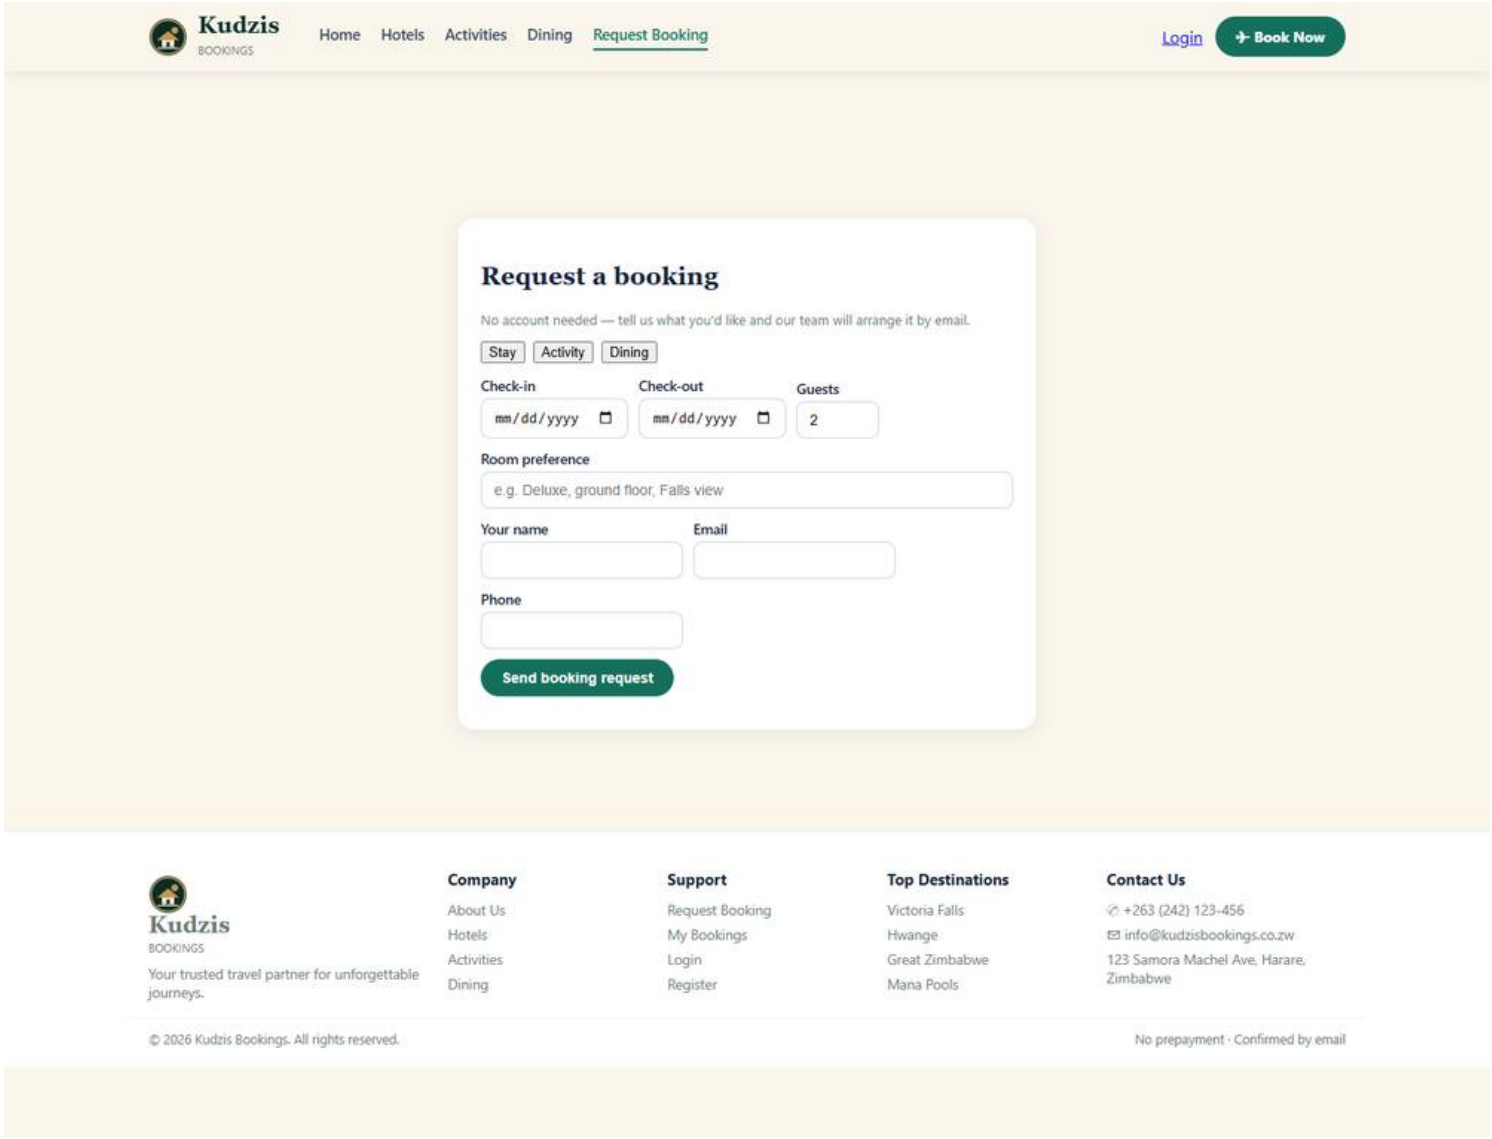

Dining

Zimbabwean lunch and dinner dishes, booked by request.

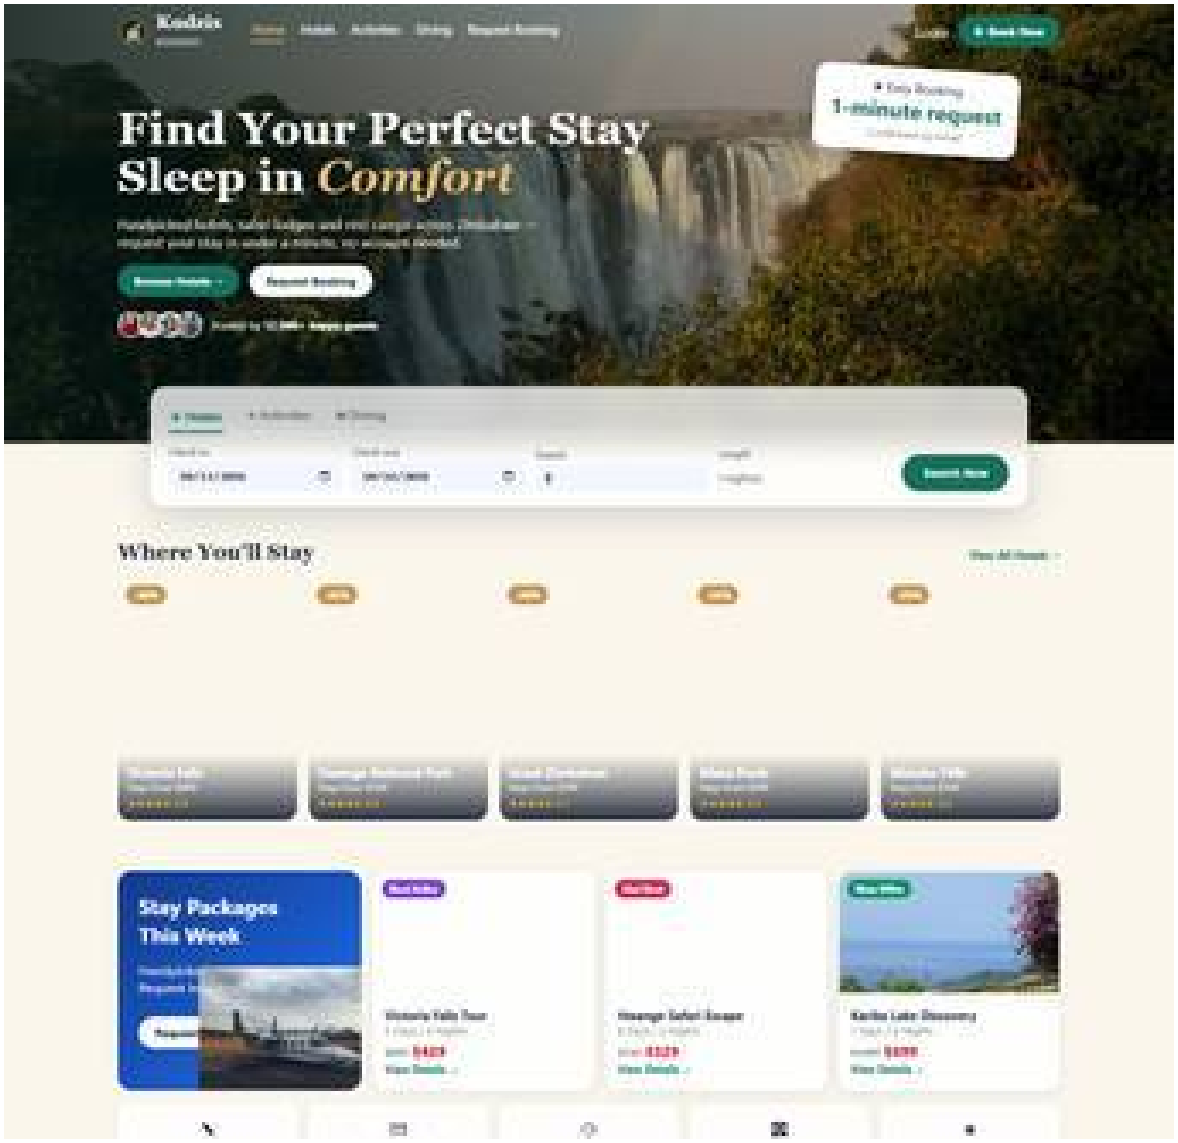

Booking request

No account needed - the team confirms every request by email.
